Akbarov Anvar Tojimatovich

*Teacher of the Faculty of military education,
Fergana State University*

Annotation: *the greatest, noble and sacred task of a person is, first of all, the worthy protection of his family, homeland and people. In this regard, it is extremely important to increase the knowledge and skills, mental potential, mental training of each son, to mature patriotic qualities in them. The definition given by the head of our state Shavkat Miromonovich Mirziyoyev on patriotism: "as we all know well, patriotism is the spiritual basis of the life of every state and manifests itself as the most important mobilizing force in relation to the comprehensive development of society" refers to the fundamental essence of patriotism.*

Keywords: *patriotism, youth, upbringing, sense of Homeland, etiquette.*

INTRODUCTION

By the 21st century, the potential threat to the security of states, disasters occurring in nature, as well as various information attacks, the fact that residents of many countries of the world are in a family crisis, the upbringing of children has completely disappeared, relations between adults and children have deviated from the original, able to contribute in every way to ensuring a peaceful, 18.9 million people or 54% of the population of our country are serving as the basis for the development of patriotic education in young people under 30 years of age. In this work, a comparative analysis of the existing system for patriotic education of young people was carried out and proposals were made to take advantage of the opportunities necessary for its comprehensive development.

RESULTS AND DISCUSSION

In the early years of the independence of our country, drawing relevant conclusions about our heroes, such as Sayyor sa'dinov, Alisher Salimov, Baburjon Ganiev, Ma'rufjon Rajabov, Ulugbek Barnoyev and others, who died in shelling against terrorist acts in the Tashkent region, to internal enemies who violated the peace of the inhabitants of the mountainous villages of Sariasiya and Uzun districts, by communicating with their loved ones, constitutes the peak of patriotic education. In institutions of higher military education, during the period of full-time military service and contract military service, patriotic education is organized and carried out on the basis of relevant regulatory documents. Another layer of the country's population, which is complicated to instill and shape patriotic feelings, are unorganized youth, which in number also make up a

significant share of the country's population. This category is distinguished from others by the fact that young people do not have assigned jobs and places of study, especially if they have a mail character to join different streams within them, causing violations and crimes. The formation of patriotic feelings in young people of this layer is fundamentally different from the formation of patriotic feelings in young people of another layer. The limited or total absence of the opportunity to systematically engage in face-to-face communication with unorganized youth is information on patriotic education that should be absorbed into the minds of young people, it is advisable to use their most visited addresses. One such address is the internet network.

Patriotism means love and loyalty to the motherland, service to the motherland and the happiness of his whole life and potential along the way, and, if necessary, self-sacrifice. Patriotism is one of the universal feeling, spiritual values, common to all people, Nations, peoples, polished for centuries. Historically, patriotism is also a set of emotions that have been improved in the process of socio-economic development, the struggle of peoples towards the inviolability and independence of the territory in which they live, associated with the fate of their homeland. It is manifested in pride in the past and present of the motherland, in sorrow and concern for its future, in defense of its interests.

Historically, it is known that when a nation wants to insult or trample another nation, first of all, it has conquered and destroyed or expelled from its homeland. There must be no more humiliation and suffering for the nation who saw that their homeland remained in the hands of the enemies. After all, the concepts of Homeland, nationality, religion are dear and sacred to a person from everything.

It is not humanity to leave the homeland to save their lives when a hard day comes to the head of the people. There is also a proverb in our people that says "be a gado in your land until you become a king in another land". A person who has forgotten others, thinking about his peace of mind, will never be faithful to his motherland, to his people.

In Islam, the concept of Homeland is comprehensive, first of all it is used in the sense of a settlement, that is, housing. The teaching of Islam states that it is one of the greatest deeds that a person protects the homeland, religion, family, where he lives. Standing in the ranks of the military for the protection of the motherland is also considered a great act of merit in our religion.

One of the scribes said: "it is known to everyone that in the world of life there are four things that man loves most, that are precious, that are valuable. Those who do not possess these four things are deprived of the honor of humanity. They are: freedom and freedom, the possession of the goods found by Labor, the Motherland where she was born and raised, and her sacred religion, which has been preserved for centuries."

The judges say, "one's fidelity is known from his grief for his homeland, his longing for his brothers, and his longing for the moments of his life that Zoe has taken away". The loyalty and dedication of a person to his people should encourage him to protect his

homeland, to find progress and be strong and powerful in every way, and to contribute at the opportunity to the peaceful and prosperous life of his people.

On the way to protect the motherland from various mercenary currents and evil forces, fast-preventive measures aimed at combating religious extremism and its various manifestations, ensuring the safety of citizens were paid off, and significantly positive indicators were achieved. From the very first days of our country's independence, attention has been increased to young people who are the owners of our future. The comprehensive work carried out in our country is important in educating the owners of our future in the spirit of loyalty to the motherland, to the ideas of national independence. However, today's descendants of the people who have made a huge contribution to world civilization in the past, it is worth noting the recognition of their heritage by World peoples, after all, such feelings in them lead to national pride and spiritual perfection, strengthen their desire to realize their national identity.

Military patriotic education gives a good result only when it is carried out in a picture inextricably linked with physical education. Therefore, military patriotic education cannot be imagined without physical education. Being resistant to cold and heat, not succumbing to diseases quickly, overcoming difficulties, volition. the role of physical education and sports games in the development of qualities inherent in the defender of the Fatherland, such as perseverance, the ability to act quickly and dexterously, in students – young people and teachers is incredibly great.

The need to educate young people in the spirit of patriotism, to prepare them physically and spiritually for the defense of the Motherland is one of the urgent tasks of the present day.

Training of students in general educational institutions, secondary special and secondary vocational educational institutions, including students and young people studying in higher education institutions in the spirit of military patriotism, is now carried out through all systems of educational work.

In fact, genuine loyalty to the motherland also requires being able to protect it. Education of students in the spirit of military patriotism is the main place of all kinds of functioning educational institutions.

The world is moving towards globalization, long distances are getting closer and closer, and on the other hand, science and technology are developing rapidly, human life is changing rapidly. However, economic and technological development is also putting before humanity new problems, new issues. Ignorance, which has been going on for a long time, remains one of the main threats to the development of mankind. At the moment, cases of "mass culture", "sexual freedom", secularism, internet addiction are also increasingly ranked among the serious problems before humanity. Preventing the threats listed above from being absorbed into the minds of young people, patriotic education of young people is one of the pressing issues that cannot be delayed at present. The implementation of this goal is aimed at the effective use of all methods and methods used

in education and education in the formation of a sense of patriotism that motivates patriotism and will remain a lifelong seal in the hearts of young people, among the disciplines that are intended to be taught in specialties from preschool to higher educational institutions. The formation of patriotic feelings in the life of young people outside educational institutions will be appropriate mainly to use media, internet networks, mavizas read in mosques, works written by poets and writers about patriotism.
