Turgunbayev Toxirjon Abdugafurovich

General preparatory cycle associate professor

Annotation: *a revision of the preparation of young people for the protection of the motherland requires a fuller use of the substantive and organizational and methodological aspects of the education of military patriotism. The effectiveness of educational activities is justified, the choice and consideration of traditional forms given and checked by the practice of military patriotic education, the development of youth*

Keywords: *spirituality, military understanding, patriotism, essence, educational institutions, modern methods.*

It is necessary to look for new forms that will make the tasks of preparing for the protection of the Motherland more fully realized in modern conditions. Readiness for the defense of the Motherland should not be considered as the result of special Mass Defense Work, military sports games and no less important forms of military patriotic education of the Bashkir military.

He is the result of the development of the personality of the reader in accordance with the law, the appropriation by him of all the riches of social culture, when we talk about a healthy person, we consider not only physical health, but also a person with excellent spiritual, moral norms, brought up in the spirit of the best universal examples.

Military patriotism has a great place in education in the formation of all valuable and intellectual sides of consciousness. However, this theoretical conclusion is not fully implemented in the practice of the work of teachers who teach the basics of Sciences.

Teachers of General Educational Sciences look superficially at the tasks of military patriotic education and the possibility of subjects taught by them in solving these tasks. Education of defenders of the Fatherland is considered with the pedagogical team as a teacher of "pre - call primary training", non-educational defense-mass events, a narrow area of expertise of the activities of the organizers of the "Patriotic" MKJ.

But if, accordingly, the student is not closely introduced to the life of the military sphere during his educational activities, is not encouraged by his higher goal of strengthening peace, the defense power of the country, it may not work to understand and replenish them through small means of "events", only a person with a wide range of thoughts can grow into a mature patriotic citizen today.

In the study of this topic, that is, in the education of patriotic youth who are ready to defend their homeland with weapons in their hands, the activities of the pedagogical team of educational institutions are to show incomparable.

Military patriotic education in educational institutions is carried out for the following purposes:

- Formation of loyalty to the Ring, deep respect for the history and traditions of the motherland; -

Education in the spirit of the need to fulfill the laws and decisions of the presidential decrees, the Supreme Assembly and the Government of the Republic of Uzbekistan unconditionally; - to promote the traditions of combat patriotism of the peoples of Uzbekistan, love of military service and army in youth, personal responsibility in the implementation of high spiritual and combat qualities, military oath and military regulations, and The main content of military patriotic education:

- To explain the constitutional duty of citizens of the Republic of Uzbekistan in the defense of their homeland; - to get acquainted with the decisions of the government on issues of further strengthening the Defense Of The Republic of Uzbekistan;

- To explain the issues to be resolved with the Armed Forces of the Republic of Uzbekistan and their functions and characteristics; - to study and master the basic requirements of the law of the Republic of Uzbekistan "general military obligation and military service", military oath and military regulations;

- explanation of the goals and objectives of preparing young people for military service;

- the heritage of ancestors, the promotion of the achievements of the martial tradition of our great and brave ancestors.

The role of social organizations and the family in the military patriotic education of students.

The role of the family in the upbringing of military patriotism is great. It is necessary to familiarize yourself with the biographies of participants in the war, veterans of the army and Fleet, who are relatives of students, to form the correct attitude to state awards. The pedagogical team of the educational institution should attract parents when organizing military activities in the way of playing students, as well as walking passes with children over distance (for example, for picking mushrooms), during harvesting or when going fishing. In this case, children should be taught to determine the location, go through obstacles, etc. Teachers can advise parents on all arising questions.

Family upbringing has a great influence on the development of a sense of love for the motherland in the growing generation, the formation of a correct understanding of its importance of protection, military courage, love for the military profession. A tribute to the traditions in memory of relatives who died in the struggles for the homeland in the family, the importance of avidly preserving their combat awards, pictures and mementos is great.

The stories of fathers about the heroic history of our motherland, the combat path of the Armed Forces of the Republic of Uzbekistan, service in the army and fleet, personal participation in combat actions have a great educational impact on children, it is very important for children to know in what years, at the front and in which countries and cities they fought for Families who develop an interest in patriotic literature and memorabilia in children, the combat path of our armed forces, the heroic courage of our people, the cinema film about the Today's combat and social political training of the heroic defenders, shows go the right way.

The committee of the "Patriot" MKJ provides for the active involvement of students in defense mass work at the educational institution, carried out extensive propaganda work of military and military technical knowledge, provides preparedness to the call, assistance in conducting their games, was considered the initiator of the creation and strengthening of a training material base for conducting defense mass events. The chairman of the primary organization of the "patriotic" MKJ is usually elected the teacher of the educational institution "pre-call primary training". It provides methodological assistance to class leaders, teachers in organizing their work on the education of military patriotism, through the participation of methodological associations of science teachers, introduces the experience of the defense of society in the educational process. In cooperation with the primary organization "Patriotic" MKJ on the scale of educational institutions, it is possible to organize the following works: the chairman of the primary organization "Patriotic" MKJ with the teacher "preliminary preparation until the call" two in the year – three times to hold council meetings on the following issues: "defender of the Fatherland "holiday," state of work on youth military patriotic education"," on preparations for the holiday of Navruz"," on preparations for the holiday of memory and appreciation"," on the holiday of Independence Day","on the work of the initial Organization for the ranks of the Armed Forces of the Republic of Uzbekistan, that is, including organizing meetings with international fighters, Labor veterans. A competition for shooting a pneumatic rifle is possible, dedicated to the day of the defender of the Fatherland.
