Abstract: *This article will talk about the role of women in Uzbek society today, the attention paid to them by our country leader, the further strengthening of their right Rights, the concept of gender equality.*

Keywords: *Society, woman, gender equality, law, violence.*

In the current process of globalization, the concept of gender equality in Uzbekistan has grown significantly. The role of women in our society is becoming stronger, and of course the role of passionate women in this society is incomparable.

The role of a woman and her in the life of society has always been an important criterion. Of particular importance is the role of a woman in the development of Uzbekistan as a state and society, her political and legal culture, which has a worthy place among the countries of the world and in the international community.

In the process of globalization today, the role and role of women in the issue of the formation of an active civil position of the new generation in relation to any conditions is important at all times. Therefore, the main content of the reforms also consists in supporting women's performances with new ideas and initiatives, ensuring their active participation in the efforts, changes and socio-political processes carried out in our country. Strengthening the position of women in society depends on the members of the same society beavosta. This includes engaging women in politics, further strengthening their education, providing full-fledged rights, creating conditions for being knowledgeable and knowledgeable.

As women move from year to year, their active participation in every area is pleasing to the eye. A woman is not helpless, she is not created just to raise a child to sit at home. A woman is an Apple and a phosila. 2

Our contemporary women occupy leading positions in society not only as an active participant in the ranks of equal rights, creators and builders, but on many fronts with their knowledge, professional qualifications. Today there is no sphere in which women do not work. They are Doctor, Teacher, farmeru entrepreneur, artist and engineer, scientist and figure. Especially the prosperity of such areas as medicine, education, culture, art and sports can never be imagined without women.

The introduction of our women into the field of politics with shahdam steps also strengthened the place of women in society once again. For example ,the president of the

Senate of the Supreme Assembly: we can get Tanzila Norboyeva what power a woman is powerful, has a thoughtful mind, has strengthened the rights of our women by doing rational work in the management process.

The proportion of selfless working women in our country is 77% in Medicine, 74% in education, and 46% in the economy and industries. If in 2017 the share of women in management was 27%, today it has reached 33%, in the ranks of political parties from 40% to 47%, in entrepreneurship from 21% to 37%.

About 2 thousand of our educated, enterprising and active women are serving in leadership positions in state and public organizations. In particular, 33% of the deputies of the Legislative Chamber of the House of Commons, members of the Senate and 25% of the deputies of local councils are women. 3

These statistics will definitely cheer up a person's eyes. These figures show how incomparable women are in place in Uzbek society today. It shows how women are treated in the Republic of Uzbekistan all over the world, what is the place of the woman.

There are various difficulties and obstacles to securing the rights to strengthen the position of women in society, as are minorities in every field. In recent years, cases of violence against women have come to the surface as an urgent problem. In order to improve the legal mechanisms for the loss of these rights, the law of the Republic of Uzbekistan "on guarantees of equal rights and opportunities for women and men" and "on protection of women from harassment and violence" were adopted, the Senate established the committee on women and gender equality issues, the Commission on gender equality issues of the Republic of Uzbekistan. In order to provide socio-economic support for women, to work with them at address, the "women's notebook" and "youth notebook" systems were established.

The promotion of such systems in our country has somewhat reduced the factors of violence against women. The introduction of the "women's notebook" is not able to find its place in our society, it will not be an exaggeration to say that for women who have been abused by their husband or lost their breadwinner, it has become a pretext to further strengthen their social status in society in order to create a future for themselves. Women make up an equal half of society they also have the same equal right as men. Because Gender equality is widely promoted in our society, there is a slight decrease in discrimination against women, bullying. 4

The health of women is strongly emphasized by the state. The reason is the wellness of society, first of all, is characterized by how healthy women are. As our country President said, "attention to the health of mother and child is attention to society, to the future, " they did not insist in vain.

In short, in society, the state is manifested as the chief reformer in relation to the protection of female dignity, her rights and freedoms. Already, the issue of expressing the rights and interests of women in society, further increasing the role and role of women in state and society relations, protecting their interests in the political, legal, social spheres is

one of the main conditions for the formation of the third Renaissance generation in New Uzbekistan.⁵

A woman is like a flower how much she is cared for she radiates grace from herself. Therefore, women should be valued to create conditions for them to be educated and educated, to which the future profession of powerless should not be considered only as a housewife, but rather to further teranize her thoughts, to properly direct the knowledge gained by a woman easily occupies a social position in society and will certainly contribute to her country with her work, scientific research.

Uzbek society has long revered and revered women as a clear example of which we can see in relationships with their mothers, sisters. In the Republic of Uzbekistan, many legislative decisions have been developed to strengthen the position of women in society, increase social activity, support women in socio-legal, economic aspects.

Article 12 of the law "on equal rights and guarantees of opportunities for women and men" of September 2, 2019, provides for strengthening the position of women in society, ensuring that women and men are equal in society in all areas, preventing discrimination by gender, ensuring gender equality, protecting and strengthening their legitimate interests, and studying and overcoming the problems that arise, in leadership areas, it has also been suggested that women are seen on an equal footing with men. This is one of the laws created to strengthen the position of women in Uzbekistan, which we can see in one article actions to strengthen the position of women in society.

The female mother, the female sister, the female sister, the more Ardak El-yurt this society will continue to develop. What kind of society will be strong is of course the society that honors women.⁶
